First Sample Box

To present the materials in the sample box, my first idea was to design a very simple box and add symbols or text around it to illustrate what's inside.

However, I noticed that you did something similar with the “Montage Set” on your website.

So my second idea was to create an open box. I wanted the contents of the sample box to be visible, while also using text to show what materials are included and how many of each. I kept the clean look and brand colors, but added a simple R24 pattern for visual interest.

Second Sample Box

For the second box, I used the same design but changed the text. I chose such a large font for the „Musterbox Glass“ label inside the lid so that users can easily distinguish between the two boxes on the website.

I also created a small mock-up to visualize my idea using both the open and closed boxes. I thought the large image would be more visually engaging, while I wanted to keep the right side simpler. That's why I also designed a closed box.

Website Mock-Up

3 Musterbox. auswählen.

Musterbox hinzufügen?

Musterbox ALU +40,00€

Beispiel Text.

Musterbox Glass +90,00€

Beispiel Text.
